

Biometrisches Seminar Wien Graz 2026

Wir dürfen Sie herzlich einladen zur sechsten Auflage eines gemeinsamen Seminars der
Wiener Biometrischen Sektion (WBS)
und der
Biometrischen Sektion Steiermark-Kärnten (BSSK)

24. November 2026, 13:00 – 17:00

Kursraum 25, Ebene 8, AKH Wien, 1090 Wien

ORGANISATION:

Florian Frommlet (Med Uni Wien) und Thomas Kuenzer (Med Uni Graz)

WISSENSCHAFTLICHES PROGRAMM

13:00 - 13:50 (Tour of the Topstats Project - Towards precise statistical analysis plans facilitating microdata analyses to advance health research)

- Susanne Strohmaier: "Reminder of often neglected sources of uncertainty in the statistical analysis of observational data"
- Daniela Dunkler: "Approaches to reporting various types of uncertainties"
- Necdet Cevirme: "A case study in pharmacoepidemiology: Practical challenges in the implementation of a multiverse analysis"
- Moritz Pammer: "A case study in pharmacoepidemiology: Reporting results of a multiverse analysis"
- Michael Kammer: "A randomized coding experiment to explore variation in implementing statistical analysis plans"
- Closing remarks

13:50 - 14:00 Wahl des neuen WBS Vorstands

14:00 - 15:15 (Vorträge von MitarbeiterInnen der Med Uni Graz)

- Jessy Hansen: „Evaluating statistical methods of outlier detection when benchmarking in clinical quality registries“
- Simon Grabner: „Functional Shapley representations for longitudinal random forests using FPCA“
- Lukas Buchhäusl: „Modeling antibody kinetics in pregnant and lactating women following COVID-19 and Tdap vaccination“

15:15 - 15:45 Kaffeepause

15:45 - 17:00 (Vorträge von MitarbeiterInnen der Med Uni Wien)

- Nico Bruder: "A decision-theoretic interpretation of frequentist error rates in rare disease trials."
- Teresa Engelbrecht: "Comparing Type I Error Measures in Hybrid Clinical Trials"
- Johannes Vilsmeier: "Covariate-based clustering to identify subgroups that benefit from treatment."
